Summer Report: 2012

Dagahaley, Hagadera, Ifo, Ifo II East, Ifo II West, Kakuma, Kambioos

This summary report is automatically generated from the Health Information System (HIS) database. It is based upon routine facility-based data, collected using standardized tools and guidelines, and submitted regularly to UNHCR by implementing partners.

The indicators should be interpreted alongside an accompanying "Standard and Indicator Guide", which provides units of expression and a corresponding minimum standard.

A narrative analysis to describe trends in indicators over time, between camps, and in comparison with international standards can also be provided; as can more detailed individual camp reports.

1.0 Population
