

Title 1

This sets the top-right region

Title 2

This is correctly ignored as we're using first: `string(top_right, first)`

Title 3

This works too

Title 4

This doesn't update title

I use the `page-cover` class to create pages with positioned elements (cover pages etc.)

Title 5

This doesn't update title either

Title 6

This page has a workaround, but requires duplicated content
