

The tilde in the math below is rendering too high, causing the line height to be unnecessarily large. This happens in Prince 11.4 and in Prince for Books 20220701.

$$Y = \tilde{\tilde{z}}F(K, N)$$

This markup was produced by MathJax from `$$ Y = \tilde{\tilde{z}}F(K, N) $$`.

This happens with block-level and inline maths, as shown in the snippet inserted into this paragraph of lorem. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Maecenas et nulla id purus porttitor

vulputate ac at arcu. The function, $\tilde{F}$ (pronounced ‘F-tilda’), captures the way in which capital goods and labour are combined to produce output. The TFP term, $\tilde{z}$, captures the contributions of everything else (the other inputs, the quality of management, the state for technology, adjustments for education, and so on.). Donec hendrerit porttitor mi, sed vestibulum mauris. Pellentesque ullamcorper augue id venenatis semper. Nam vestibulum libero aliquet, dictum lectus eget, suscipit tellus. Phasellus in turpis at elit facilisis ultrices. In porttitor pellentesque felis, vitae auctor lacus. Curabitur et augue nibh. Duis suscipit consectetur turpis, non venenatis nunc sagittis at. Pellentesque lacus nulla, fringilla maximus enim non, aliquam faucibus purus. Vivamus faucibus non diam et semper. Quisque et turpis nec ligula molestie dignissim. Vivamus fringilla nibh ut mollis consequat. Nunc accumsan neque et ipsum luctus sodales.
